Professional Experience and Curriculum Vitae

I begin to enter a photography world in 1999. Start with analog camera, I realize that photography can take me to another metaphysics world. A contentment that can be feel by myself, a different angle of beauty. Motivated by my lecture, Risman Marah – the one who introduce me to SLR Camera, I begin to capture a moment especially a beauty of landscape and the human it self. With my first camera, Yasica fx-D, I deepen photography and found my self. Fall in love with the beauty of differences, I learn how to optimize the colors by digital creative imaging. I learn how to excrete the beauty of photo by color and dimension post processing without embody an additional object to my photo with self – educated. With digital creative I found a double complacency. I can capture a beauty with photos and I can keep continues my passion in painting by post processing my photos. With my passion on photography and art, I hopes that his work can be enjoyed by any level of society.
