AN INFOGRAPHIC LOOK AT

UK SPIDERS

SPECIES BOTH INVASIVE & INDIGENOUS TO THE UNITED KINGDOM

There are **450 different species of spider** calling the UK home, with reports suggesting there may be up to **500,000 spiders living in every acre** of the United Kingdom. The most common spider is the Garden Cross Spider, but what about those that aren't native to the UK? In this graphic we'll look at the native and non-native spiders living in the UK, as well as those that bite, those that don't and some handy tips on how to keep your house (near!) free of arachnids
