Professional Experience and Curriculum Vitae

The word "photograph" was coined in 1839 by Sir John Herschel and is based on the Greek (phos) "light" and (graphê) "representation by means of lines" or "drawing", together meaning "drawing with light."

Larry Griffeth and Robb Maag of Light Sources Inc have been "drawing with light" in the North Metro Atlanta area for decades. Working from our studio and on location for a diverse clientele, we photograph products, architecture, aerials, industrial, interiors, lifestyle, food and most anything related to advertising, public relations and commercial photography.

We thank you for taking the interest in our website and would love to hear from you concerning your next project or anything else that comes to mind.

Awards and Accolades

Light Sources Inc. is a general commercial photography studio that has operated in the North Metro Atlanta area for eons. We've seen trends come and go and may have initiated a few ourselves.

The progression from Hasselblads and dark rooms to digital cameras and Photoshop came easy to us. As one might expect, we have enough equipment for almost any job and are equally comfortable on location as we are in the studio. We also have the advantage of being flexible enough to cater to varied budgets and a multitude of projects.

So, if you don't mind working with a couple of experienced lens slingers that think photography is still fun and business should be equitable, then give us a try.

While you're at it, look through our website, especially the portfolio section, and tell us what you think. Though we lack a lot of bells and whistles, our webmaster is always keen on feed back and so are we.
