Professional Experience and Curriculum Vitae
Films have always been an inspiration for me. Some of the best films I have seen so far are The
Shawshank Redemption, The Godfather series and so on. The possibilities in this field are immense
and that is why I have never stuck to one genre alone. Visual effects, film making and documentary
are some of my interests. My team and I have traveled extensively trying out new areas and holding
exhibitions in photography. Deep down I believe cinematography is my mojo and I hope to one day
bloom in this field.
