## Professional Experience and Curriculum Vitae

"indonesia architect & architecture indonesia" mr.rony is architect indonesia that always consistently ideal with the tropis minimalisme style. architect minimalis is my choice because 'architecture minimalis is simplicity, clean style, good looking, efisien, higienis, ekonomis, flexibel, easy for build, up to date with a style. having more usefull. but my minimalis is indonesia not Eropa or amerika, its exactly diferent basic culture and environment. indonesia is tropical, with high rain. because of that "minimalis in tropis is suitable architectur now in indonesia" ok..god bless in you all..

## Previous Clientele

The young architect from indonesia
