Professional Experience and Curriculum Vitae
www.facebook.com/pages/Rupydetequila/75204538377

Ruth Fitta-Schulz born Veracruz Mexico, is a Lucky girl that lives in Germany with her amazing husband Jan. She loves to work with paper colors and pencil and she almost always work digitally as she did many years in Spain using her top 10 draw secrets. she could tell you step by step how she made every pixel in her work but then maybe she´d have to kill you. she loves to observe things around her, lately she is discovering new nature textures in her digital microscope. Her words: I felt in love with digital art, it is a cool way to express everything,feelings,passion for colors, or it is just a fun way to create things, to make possible the impossible. I experiment a lot with my 3 favorite words light, transparency and texture, and the inspiration is everywhere, in my innerworld,comes from music, sometimes inspiration comes from a kiss, from a delicious icecream, from a misterious smile, the weather...most of the time comes from everything that move my emotions

When I’m writing up feedback I always have to step back and think that someone, somewhere in the planet is REALLY going to wear this. This illustration that I made. With my mexican hands. In my wood chair. In my mini studio. Something about this seems still unbelievable to me. I love creating new colors every day in Karlsruhe.
