Professional Experience and Curriculum Vitae

I am a photographer with 3 years of experience and currently living in New Zealand.

As a teenager, I felt an immediate desire to understand the visual language and I knew that photography would be my profession. I know the importance of capturing the moment and I work with the belief that every picture tells a story.

For two years I worked as a photographer's assistant in India on fashion shows, model shoots and advertising. As a photographer, I am able to work comfortably among people with careful attention to detail and composition.

Previous Clientele

Please kindly get in touch for more information.
