Professional Experience and Curriculum Vitae

I am a Graphics Designer, Illustrator, Cartoonist and 3D artist. I create "One Of A Kind" custom machines that I call "SpaceRods" which are futuristic Hot Rods, Trucks and Choppers that have nostalgic features like tons of chrome, huge powerful motors, original wheels and so much more. I am from Hawaii, but now live in Keller, Texas with my lovely wife, Malia... I offer a wide variety of expertise in the area of Art, Graphic Design, Cartooning, Airbrushing, 3D Rendering and much more.

SpaceRods... We are a fun and exciting custom auto design firm that will collaborate with builders to work together designing and producing our SpaceRods to possibly market to the masses. We are already talking to builders about producing our SpaceRods products and we have so much new interest from new clients for a collaborative build program. The first designs had a cartoon flair then grew into more realistic creations as time went by. I've done literally hundreds of designs and have more to create! Please check them out and share your feelings... Thanks, take care, Aloha and God Bless, Sal Salvador... "Dream Big, It's Free"... SpaceRods...
