Professional Experience and Curriculum Vitae

I'm an Industrial Designer. I have a strong believe that a good design is the combination of a good observation and the rituals research. Comic lover, in my spread time I do some graphic design, although, my actual job demands me to have a lot of graphic influence. Right now I'm learning about the TOC (Theory of Constrains), very useful when you are trying to understand how production should work.

Previous Clientele

I worked as an employee for Cosmética Ltda (Colombia)´
