Professional Experience and Curriculum Vitae

*Directors *

-Successful Businesses in UK Problem with outsourcing Solution

The intention-

To provide the best quality of product and service to their clients from U.K and India.

The Process

We want to achieve this by applying good business practices used in The UK to the running of Satej Infotech Private Limited while at the same time taking into account the Indian culture and work environment.

Spare capacity utilization

70% of the development capacity at Satej Infotech is utilized for outsourced work from abroad.

We aim to utilize the remaining 30% capacity for customers from India who want and expect the same levels of quality of product and service as our foreign clients.

Benefits of Kolhapur as a location

-Easy Connectivity to all major cities

-Availability of a good pool of candidates

-Upcoming Destination for IT companies

We intend to position ourselves so that we can make these advantages available to our clients
