Professional Experience and Curriculum Vitae

Presentation

Here I am, Sebastian Ratti born in Carrara in 1978 and still live my profession as a photographer with the same enthusiasm as when I was a teenager and I emozionavo before a sunset, so that was printed in my eyes.

Surrounded by fantastic colors, scents and flavors of the Apuan Alps and the Tyrrhenian Sea, I received as a gift from my mother my first camera at the age of 16 years, and from there it was a dream come true, who became a passion, which is then fed into my profession.

Genres / Types of Photos

In choosing the style and the type normally let myself be guided by emotions, so I would say that the best definition for the types of photos that I love to do is EXCITING.

In my experience I have worked and took a lot, I realized photographic services for Weddings, Classic, reportaggistico, targeted and tailor-made, I also did some "alternative".

I have worked for companies that I have requested catalogs, advertising material, etc. ...

But in all my photos, there is a single thread that binds me and the links between them, the excitement!

The thrill of passion that I put in every click, the passion that I capture every click.

In my photographs, there is an added value, and that value the gift from the heart!

Curriculum Vitae / Experiences

I started to take my first photographs stealing the camera of my father, for school trips, it was a PENTAX 50mm lens mounted on a very bright, a fantastic machine, which allowed me to understand what my passion.

Techniques, which were at first completely amateur, have been refined over the years of experience and the frequency of various online courses, I read biographies of great photographers portfolios and watched hundreds of colleagues from all over the world and from different ages and from different walks of life and race, I tried to understand from their photographs, the various messages they wanted to communicate, and the emotions they wanted to convey.

With time, then, this passion has followed its natural course and gave me the chance to open my own studio.

The studio was founded in 2004 to complete my personal growth, not only as a man, father and husband, but also as a photographer.
