Professional Experience and Curriculum Vitae
All our kitset farm sheds are designed to be practical, cost-effective building solutions to meet the exact needs of our customers.

Our farm sheds come with:

We use only top quality materials in each kitset shed we supply. Our nz made timber shed designs include H5 treated poles, giving you a 50 year no-rot guarantee. Our timber shed framing is NZ quality MSG8, H3 treated with a 50 year durability.
Bird proof design
The roofing and cladding is 0.4 gauge, either corrugated or 5-rib profile. Cladding is available in either Zincalume or Colorsteel and is supplied with a 15 year guarantee minimum, 25 years for Colorsteel. *conditions apply.
All bolts, washers, nuts, nails and bracing supplied with our sheds are galvanised as standard, or can also be supplied as stainless steel in corrosive areas.
All our self-build Kitset Sheds for sale include full assembly instructions, plans, engineering calcs, and producer statements to help make a local council consent process as straightforward and as simple as possible.

We can arrange construction of our nz made Kitset Sheds for sale for you almost anywhere in New Zealand, just contact us for a quote.

The roofing and cladding is traditional NZ steel, 0.4 gauge, either corrugated or 5 rib profile, and cladding in either zincalume or colorsteel is available. All bolts, washers, nuts, nails and bracing supplied with the kitset are also galvanised.
