## **Professional Experience and Curriculum Vitae**

Hello! My name is Tamara Solomon, and I'm currently finishing up a Bachelor of Information Technology degree in the field of Interactive Multimedia and Design. I can design websites, do back-end programming, bend Arduinos to my will, and take some pretty cool photos, among other things. Feel free to take a look through my portfolio, and let me know if anything strikes your fancy (or doesn't... all comments welcome!). If you're interested in collaborating with me on a project, please do let me know that too!

Cheers!  
-Tamara
