## Professional Experience and Curriculum Vitae

"I used to think I was the strangest person in the world but then I thought there are so many people in the world, there must be someone just like me who feels bizarre and flawed in the same ways I do. I would imagine her, and imagine that she must be out there thinking of me too. Well, I hope that if you are out there and read this and know that, yes, it's true I'm here, and I'm just as strange as you." - Frida Kahlo

My work has always been a reflection on my inner world. From the time I was little to the present day, the collages I create are an attempt to illustrate how I see the world around me. Recently, I've been using my art as a way to illustrate the visions I have during meditation.

I started out doing all my work by hand. The tactile quality of creating hand-made work was something I cherished. But of course, when one moves out of their small hometown in Minnesota to New York City, one doesn't necessarily have the available space to create a full-scale traditional collage.

Digital collage is something I've recently started working with. Living in a tiny New York apartment really forced me to get to know my computer. It was definitely one of those 'happy accident' situations. My work has grown leaps and bounds since using digital media.
