Professional Experience and Curriculum Vitae

In times when there is a camera in every pocket, the creativity is crucial to identify an artist. Kako is a photographer with a unique point of view, not suitable for prudish. Profound at a point that can be dark, conceptual in a way that might turn abstract, his works are always dramatic. There are many ways to acquire beauty and, in his case, the path usually goes from rejection to transcendence. Retouch is a tool he uses as a mean to achieve realities beyond ours, that are both familiar and strange. You can love his work or hate it, that's the point.
