Professional Experience and Curriculum Vitae
SPARC DESIGN is a professional consultancy firm committed to good design and its practice in the field of Architecture, Interiors, Landscape Design, Master Planning and Turnkey Solutions. We see design as a means of heightening the human level of consciousness and spatial experience.

We at SPARC DESIGN see design as a means of heightening the human level of consciousness and spatial experience. We believe that designers have a sense of obligation towards the community to make a difference in the lives of people. Our goal is to provide a synergistic response to aesthetics, experience, economic viability, and quality of design employing our creative wisdom that we have acquired over the years of operation.

Interior designing for us is the work of pure art and sheer dedication. Our approach towards interior designing is just like creating an artwork on a blank canvas, thoughts, feelings, and interactions painted out on a differently shaped and sized canvas every time. Innovation and out of the box thinking finds its place in all our projects, as we pay special attention to intricate details and include local craftsmanship to bring out the best-combined experiences.

Landscape design to us is the essence of bringing together the exterior and interior of the project with perfection. Our landscaping projects are the results of all the contextual influences and include minute attention to handcrafted drainage, lighting and other related services. We have been continuously breaking newer grounds with our creative approach in landscape designing, thereby creating a niche of our own.
