Professional Experience and Curriculum Vitae

Good design creates positive experiences between people and products, spaces or systems.

I am an Environmental Designer specializing in Lighting, Furniture and Spatial Design. My work has been published domestically and internationally and has won awards in a variety of design and architecture competitions. I am also the founder of And Then What Creative, an Experiential Marketing and Design agency.

My strength comes from my background in both Design and Marketing. I enjoy applying a variety of disciplines to each project and strive to create experiences that excite, captivate and connect with audiences. I seek out challenging projects that offer the opportunity to explore new categories, shape new markets, and make the impossible possible.
