Professional Experience and Curriculum Vitae

The Studio Ratti was born in 1971.

He immediately addressed exclusively to industrial and advertising photography, or other related businesses. In all these years we have worked with companies of national and international importance as you can see the list of clients .

The vast experience and up to date and advanced equipment allow us to tackle any issue photo for full customer satisfaction.

In 1999 we made the transition from traditional photography to digital technology in high resolution with a particular specialization in textiles and art of the highest quality.

For some years we have turned our attention to panoramic photography in high resolution and then

to aerial photography , always panoramic and in high resolution, which allows us to print highly detailed blow-ups of enormous size, as can be seen in the examples.
