Professional Experience and Curriculum Vitae

Printed paper tape that protects your product from theft and tampering. Each roll is made of white reinforced paper tape that cannot be easily removed without leaving any damage. This water-activated adhesive instantly attaches to the carton upon application. Your item's safe arrival also comes with an impressive branding opportunity. Design each roll with your logo so customers easily recognize your brand upon receipt. Your logo is printed in a repetitive pattern throughout the tape length to amplify brand recognition and association when your customer opens the package.

Running a business often involves shipping out packages to customers. Send envelopes, boxes, and other important items with peace of mind by using custom printed tape.

Printed paper tapes contain a water-based adhesive that adds a layer of security to parcels. Also called gummed tape, it is tamper-evident, making it easy for you and your customers to see if the package was opened during transit.
