Professional Experience and Curriculum Vitae

I am a driven and motivated entry level graphic designer having completed an internship at Mindshare media agency. Here I have honed in on my skills and tested the water in an area where I may dabble in the future.

Having graduated in 2011 with a Bachelor of Design in Visual Communication, I am a creative professional just starting out and making my journey as to where I fit in in the Australian graphic design industry.

I have a relaxed and friendly disposition with an aptitude for professionalism and results. I like a challenge and enjoy learning new things. I like to push myself! Although inexperienced in some areas, my persistence and determination keeps my goals and skills within perspective.

I have an innovative and unique way for approaching design. I aim to strive away from the clichés and emulation of ideas. Experimentation plays a major role in my practice as I like to test several ideas to come up with more than one solution.

My personal work ethos leads me to believe that there is always room for improvement, I prefer to continually modify my work. I appreciate the extensive and refining nature of the creative process and design thinking in visual communication. Over the course of my academic and professional experience, I have learned to value the research, development and results involved in the field of graphic design.
