Professional Experience and Curriculum Vitae
Food and Photography

I love food, and am intrigued with interesting combinations of flavors, (you can get some interesting ideas from Food Network's Chopped!). I admit, I'm fascinated with the culinary arts, and the chef that develops a decadent chocolate cake that has no calories will be my hero!

Photography is my passion, and photographing food is the perfect fit. When the chef brings out his/her creation for me to photograph I love to see the textures and colors of the food and how the light falls around the dish. Every dish is a new opportunity to create something special.

When I'm not photographing food I enjoy taking photographs of life around me.

Previous Clientele
