Professional Experience and Curriculum Vitae

The Design Factory is a small, highly creative design and web agency based in London W1.

As a small agency we pride ourselves on the personal interaction and quality we can give our clients. We are transparent in how we work and do not impose layers of personnel between our clients and our creative team.

We handle everything creative from branding, packaging, corporate literature and advertising all the way to the finished printed product. We have years of experience in working with print and handle print for at least 95% of our clients. We also have in-house large format printing facilities which include poster printing facilities of upto 1.5 metre wide and mounting facilities.

Our web knowledge not only extends to visually appealing front end designs, but probably one of the few creative companies that have excellent technical skills. Unlike a lot of companies we build bespoke content management systems which allow site owners to update every aspect of their websites - no matter how complex the requirements are.

We welcome all types of clients including start ups who are serious about positioning themselves in the market place, to established organisations looking to add a different dimension to their work or who are tired of extortionate agency fees.
