Professional Experience and Curriculum Vitae

Primarily found constructing or manufacturing new gizmos and gadgets in collaboration with creative thinking entrepreneurs inside of TechShop SF. I can also be caught at WordPress meetups, Google Ventures pitch nights, Startup Weekend (where my engineering took the top prize) or other hacker spaces.

If you are looking to fire up a Kickstarter, build a prototype, get featured in Make magazine, or run a display at next years Makerfaire. I might be your kind of consultant.

I can manage any kind of project, but when you get into mechanical, robotic fun stuff then you've engaged me at my core and I'm far better at my core.

Previous Clientele

LEAP MOTION
EMOTIMO
8BITLIT
CALI CRUZER
ORU KAYAK
J STORM
COZYLAP
TECHSHOP

Awards and Accolades

MANAGEMENT: Developed strategy in the areas of software development, business, engineering, and field staffing. Delivered end-to-end solutions for small & medium sized businesses in traditional and industrial applications.

TECHNOLOGY: Designed database and .Net Programmed Software solution, completely original to the field of customer facing kiosk solutions. Revolutionized the taxicab industry by engineering the most successful software platform in the market for passenger-facing technology. Setting the standard for the industry and follow-on application development.

SALES: Closed a total of \$2.4 million in deals with advertisers, fleet owners, and investors.

DELIVERY: Assured accountability in all practices, from internal human capital management, reporting to investors, reporting customer project benchmarks, and factual results, based on numerous business areas. 100% results achievement and customer satisfaction standards.
