Professional Experience and Curriculum Vitae

Thibault Sendra
Painter, Graphic designer, video animator
Born in Roubaix, Northern France
Lives in Vancouver, BC

Started my education in art by studying in high school at Tournai in Belgium, then I spent a year studying Graphic Design followed by a Bachelor's degree in Digital Art in Brussels, Belgium.

For the past two years I have been expressing my creativity through freelance video animation.

In 2011, I discovered my passion for canvas painting.

Painting

The discovery of new sets and many different cultures fed my joy of painting.

I seriously started painting when I arrived in Vancouver.

I immediately felt in harmony with my ideas and enthusiasm.

Drawing observation and Acrylic was not unknown to me before I arrived on the West Coast.

I first started painting my friends and my family for practice.

Painting a person is not a formal representation of a face or body, for me, this picture has to identify his character, his look, his emotions, his soul.

Video

Video production is completely different than from painting because it uses fixed images and is more unpredictable.

Motion Design requires more investment of time and labor.

Each project must be structured to meet the needs of the subject, while retaining an element of simplicity and graphic creativity.

I personally need a video project to be a challenge in order to have a satisfactory result.

I enjoy working in mixed media combining photography, drawing and video.

For editing and effects creation, I use After Effects, Tv Paint and Photoshop.

My next goal will be to combine my skills as a painter and video editor to find some kind of symbiosis.
