Professional Experience and Curriculum Vitae

Hello my name is Mark Mentzer. (727) 333-1485. Welcome.

Allow me to introduce myself. I was born and raised in New York. After attending High School in Westbury, NY I attended the School of Visual Arts in New York City, NY. After art school I moved to Los Angeles and worked on Star Wars, Tom and Jerry and Fat Albert, I also have worked for numerous well renowned studios.

Now I've relocated to Florida and decided to branch out on my own. Always being very creative and working independently even while working for others, I feel this is the best use of my creativity and talent, while also being my best way of servicing a wide array of clients with diverse needs. I enjoy not being boxed in within parameters given to me by an employer so I can use my wide range of talents, and not be limited to just working for limited categories of clientele.

I have been designing websites since 1995 with a unique background in graphic design, logo creation, business presentations, entertainment websites, small business websites, large business websites, business events and animation. My portfolio shows samples of my style. Feel free to send me a description of your project ideas and I will be glad to supply you with a quote.

I've used Flash to create animation and illustrations since version 1 and Photoshop since version 2. I create affordable small business and personal websites, entertainment websites (WordPress a specialty), presentations and print media including logos. I have been a graphic designer since the late 1980s.

I find the best ways to achieve full exposure on the Internet, improve search engine optimization and ranking, and always find a way to showcase your project in the most innovative way possible to represent your company.

My artistic soul has emerged and developed into digital art painting. Spirituality has inspired my present work on mandalas. As an Animator and Interactive Designer, I have over 20 years of computer graphics experience and over 15 years experience creating interactive media. I've been using interactive media technology, including Macromedia Flash, Director, Adobe Photoshop, After Effects and Adobe Illustrator since 1988. Living in Largo Florida and specializing in Website Design, Cartoons, Logos, Flash Animation, Graphic Design, Print Media, Business Presentations, Entertainment Websites and Small Business Websites, I am indeed a jack of all trades.

Previous Clientele

MTV Networks
Lucas Films
