Professional Experience and Curriculum Vitae
Art in all of its forms, has gotten me through many hard times. There is also the fact that I am of Polish descent and in my family, there are writers, painters, composers, ceramic artists, jewelry makers, media moguls, (most of all who have made names for themselves on national levels). Like them, I believe that I am forever bound to my creative forces, which manifest in a nomad kind of life. But I believe that what I have to offer, as an artist, is unique and I hope to achieve the kind of success that allows me to continue to offer inspiration and a different perspective of the beauty that I see in the world. In attempt to support my efforts as a self representing artist, I am trying to sell some work online. Your interest and purchases are very valuable to me and are much appreciate. Thank you.
