Professional Experience and Curriculum Vitae
Tracy spent most of her childhood years at her father's photo studio, where she developed her passion for photography.

She also modeled for a few years, which gave her a unique perspective of lighting and a special gift for working with models.

Tracy has a unique specialty of shooting people underwater. She uses state of the art underwater digital equipment, as well as a variety of lighting techniques to create stunning, high quality underwater images. After years of experience shooting people underwater, Tracy has mastered the art of casting and working with models in the underwater environment, making them feel comfortable and at ease. She is PADI diver certified, and loves to shoot sea life in the ocean as well!

Her work includes Advertising Campaigns, Editorial, and Catalogs. She shoots on locations in California, worldwide, or in studio. She is based out of Los Angeles, and also has a home with her husband on the Riviera in beautiful Santa Barbara, California.
