Professional Experience and Curriculum Vitae

Inspired by a custard toupee, the skin of an orange, and an orifice widely believed to be a
mouth, Trumpface is a typeface made with Donald Trump’s face.

e wanted every glyph to be a character in itself, created with elements of Trump’s face. We
had fun with it to make them all different, some you have to rotate to find the face, others are
more abstract for example the ‘i’ is but a lone toupee blowing in the wind.

The typeface is now available to download for use on Abobe Photoshop, Illustrator, Microsoft Word and of course, Powerpoint. Download the font for free at trump-face.com, create your own posters, and share with #trumpface !
