## **Professional Experience and Curriculum Vitae**

More than a photographer, a complex visual artist. Accustomed with mixed visual media, after the graduation from Art Academy, photography came to me as the final switch, after design, production design, television, graphics and painting. Due to this background my approach is closer to cinematography, so, every detail is thoroughly studied: lights, make-up, hair, style and sets. Moreover, the pursuit of perfection continues in the post processing phase - final digital retouches.

I'm mostly interested in fashion, beauty, portrait , nude and glamour photography.
