

Professional Experience and Curriculum Vitae

I am an independent abstract artist based in the English Midlands and London. I make art collages in a range of sizes and also greetings cards with original art on them.

I started making collages as a way of decorating my walls while I was studying Politics at university in London. Soon I began to add extracts of my writing to these pieces of mini-art. Since then almost all of my artwork has had some link to writing, either of my own or of other writers. My writing has also been influenced by the artwork in turn.

I love finding interesting and beautiful materials to work with from all over the world.

I spend most of my time making striking collages which can be purchased as bespoke pieces or personalized to suit each individual customer. I create these with a combination of photographs, printed text, images and clippings.

I also design and produce a selection of handmade cards which can be made to measure for each customer, bought individually or sold in sets. I am very open to custom designs and love new ways of using collage.

I am inspired by literature, nature, music and my friends. My designs follow the seasons but not the trends. I take pride in finding new and interesting materials to create innovative pieces to suit each person. I'm sure that there will be something in my collection perfect for each person.
