Professional Experience and Curriculum Vitae
BIB design has a long history in the design of many successful and innovative products for a wide range of international clients.

A philosophy to always seek the innovative, the sustainable and the most effective solutions for the development of new products. Generating concepts that help build strong bonds between clients and their customers with designs that can both surprise and endure.

Working with a network of professionals and integrating with the client's inhouse teams, we can offer an integrated service covering all stages of design and development, from initial feasibility studies to final component specification and the generation of promotional images.
