Professional Experience and Curriculum Vitae
Founded by designers Mike Boylan + Danielle Pecora, Wander Workshop is a Brooklyn-based design studio that produces housewares that are thoughtful, useful, and made to last. We strive to elevate the everyday through the beauty and function of our products and are continuously inspired by our passion for food, drinks, and travel. All of our products are proudly made in the USA and a portion of all proceeds are donated to charity partners that fight hunger and provide clean drinking water.
