Professional Experience and Curriculum Vitae

I'm a top professional freelance graphic and web designer with over 12 years agency experience in the creative industry, both in the UK and with international roles.

My ideas led design mainly covers agencies or companies in Bath, Bristol. Swindon & even London. I also take on work direct from SME's, start up business & venture capital companies. Either by word of mouth or recommended.

I work closely with B2B and B2C consumer businesses to help management communicate creatively, promote their products and services, to create a difference. You will love my intelligent marketing approach. First I question, then I research, then deliver a powerful planned course of action.

So whatever your project, be you a new company that has a brief in need some serious thought OR a design agency requiring some extra help, then get in touch.

Also, by working online & being able to send print ready pdf's by email, I can accept work from anywhere in the UK.
