Professional Experience and Curriculum Vitae
Place is a creative studio that works with ideas applied to design experiencies.
Place means projects for any kind of support.
-
During the last years we worked for important consultants, where we developed projects concerning any of the branches related to designing.
We got to meet great artists and designers, and together, we went through different fields, from advertising to animation, from graphic campaigns to environment design.
Such experience got us to create our own environment, a space wherein we can mix both art and creativity, concepts and design: Place.

We are Place.
Founded by Eloy Krioka + Blas Lamagni from Buenos Aires, Argentina.
