Professional Experience and Curriculum Vitae

Weckner Design is a Glasgow based furniture redesign company with the objective to redesign old, discarded furniture and create unique, sustainable and functional design. In contrast to today's throwaway society Weckner Design encourages a sustainable living.

Weckner Design offers both commissioning and a blend of retro and contemporary design with a Scandinavian influence.

Weckner Design primarily uses reclaimed furniture. Non reclaimed materials are sourced from socially responsible suppliers and uses recycled and organic material where possible.
