Professional Experience and Curriculum Vitae

Based in London but with strong links with the North of England, Ferret is a full production service for the photographic industry.

We work with award winning photographers and agencies in London and the North on advertising and editorial shoots all over the UK.

With a background of over 15 years within the industry Ferret has the experience, contacts and knowledge to provide your shoots with locations, permits, casting, prop finding and research.

We can provide as much or as little support for your project as you need.
So if it's a little ferret or a big ferret, a little bit of a ferret or a whole lot of ferreting, get in touch.
