**Professional Experience and Curriculum Vitae**
I am automobile engineering student at University of Manchester. Due to graduate in the coming months, I am eager to secure challenging roles in automobile engineering.

In the second year of my degree I undertook a 6-month placement at an engineering company in Manchester. I was delighted to be presented with the opportunity to utilise the skills gained during my studies to solve problems in the engineering world. That time period I got practical car repair experience as well.

My studies have provided me with broad proficiency in the use of automobile engineering methods, tools and techniques. Alongside this, I have developed sound communication skills while delivering presentations to large audiences at university. As such, I am confident that I can make an instant impact in engineering roles.

I am eager to hear about potential career opportunities, so I would be pleased to chat about job openings in the engineering sphere.
