Professional Experience and Curriculum Vitae

Woodly produces furniture, lamps and furnishing accessories in a zero impact, sustainable fashion. Our research for a correct production led us to using the newest methods and, sometimes, to rediscovering the oldest ones. We use raw materials that are renewable, biodegradable and not toxic.

To us "sustainability " is achieved through different actions, each one having at its center the idea of balance, to be able to give as much as we take through economy, environment and man. Every day.
