Professional Experience and Curriculum Vitae

My ideals of culture, intellect, romance and spirituality are the engines of my creative awareness. I often see images of a modern entity grounded by culture. In other words, a lifestyle with nuances of significance and origins. I savor wisdom that has been aged through centuries of distortion and enduring accumulation. I softly inhale the warm aromas of failure, success and their seed, culture. The low notes of fallible mistakes illustrate enduring ambitions and strength, in combination with nostalgic high notes that ends all suffering. I feel my life as a light caress, a romance and a balance of contradicting ideas that brings forth an abundance of inspirations. A perfect love story with playful humor and comfort. I hear melodies of achievement, kindness and unconditional affections. These sounds of triumphs and the chorus of everlasting beauty are orchestrated by unity. Finding happiness in the darkest and lightest of situations appeal to my senses and it will be the philosophy that I will loyally portray.
