Professional Experience and Curriculum Vitae

I'm a fine artist living in Lincoln, UK I work in all mediums from simple biro sketching to mixed media to purely digital, I feel that the way in which you create your work shouldn't pigeon hole it's importance or relevance to the creative world. My current undertaking is within abstract and experimental fine art film and am constantly on the look out for locations to display my work whether it be an installation, painting or photography.

I have a degree in contemporary lens media which I received from Lincoln University in 2011 in which I specialized in moving image I am willing to try my hand at anything in the creative industry as you can see from my website, and never stops working finding interest in everything creative.
