Professional Experience and Curriculum Vitae
Yozu are a team of consultants, developers and designers based in Liverpool. We offer software development services worldwide, through decades of combined experience. Our skills provide secure, scalable and maintainable solutions for businesses and organisations alike.

In plain English, we’re professional geeks. We spend a little too much of our free time obsessing over how we can improve a product or idea. We like to work with new techniques or technology we expect will be a perfect fit for our client’s projects. Mobile app development we're really good at. Take a look at our case studies if you don't believe us!

Founded in 2013, we have been privileged to work with a broad spectrum of clients both big and small, from blue-chip companies through to start-ups. We now work alongside clients in the UK and Europe who trust us to solve problems and deliver value for their business.
